A Leader in Global Public Health

At Tulane, we recognize that good health is important to everyone. **We provide students with a foundation in public health and practical skills that will take them anywhere – from a community health center in New Orleans to a multi-national healthcare agency to a non-governmental organization working in low-income countries.** Tulane's public health degrees provide both fundamental skills and specialized study so that our graduates are prepared for current and future challenges and changing dynamics in public health throughout their career.

Other Programs

Research Degrees

Tulane offers three research-oriented master of science degrees in biostatistics, epidemiology, and clinical research

Distance Learning

Tulane's online program is designed for mid-career students with work experience. Four degrees and two certificate programs are offered through the Department of Global Environmental Health Sciences.

Combined Degrees

Several combined degree programs are open to students who have been accepted into the Tulane School of Public Health and Tropical Medicine and another Tulane graduate school. Our MD/MPH combined degree program is the oldest combined medical/public health degree program and one of the largest such programs.
